Comments Analysis:

Comment 1: Such a great, step by step explanation of everything. This is NOT easy to come by. Great job!

Prediction: Not Spam

Accuracy: 12.00%

Comment 2: Thank you so much. This video helps me understand what SharePoint is.

Prediction: Spam

Accuracy: 54.00%

Comment 3: Finally!!! A video with a step-by-step breakdown of how SharePoint is structured and works - AWESOME CONTENT!

Prediction: Not Spam

Accuracy: 2.00%

Comment 4: Thank you. Great resource to get up to speed.

Prediction: Spam

Accuracy: 59.03%

Comment 5: AWESOME (Zabardast)

Prediction: Not Spam

Accuracy: 0.05%

Comment 6: Can't thank you enough for sharing this

Prediction: Spam

Accuracy: 62.21%

Comment 7: This tutorial is a perfect example for "How it started and how it is going"..

Prediction: Not Spam

Accuracy: 4.22%

Comment 8: um site's do store content. you can't have a list or a library with out a site. so like a Tupperware set the first container is the site. in that site you can then store data via a list or library these are the second containers (which is a the point you make, a good one). so if someone asks you where is that document template for new equipment request you will likely tell them the site name. not the document library name. as you say..."sites are self contained environments for their data". this is a good description and still applies today even if you are using a hub rather than the older hierarchy model.

Prediction: Spam

Accuracy: 63.00%

Comment 9: Extremely helpful. It is very time consuming helping others understand what SharePoint is, what it can do, and the constant old versus new version issue adds to the problem. I will be recommending this to many of my clients for familiarization. Well done!

Prediction: Not Spam

Accuracy: 32.00%

Comment 10: The best explanation about sharepoint I've found!. Step-by-step, clear and focused on teach, not just show. Thanks a lot!

Prediction: Not Spam

Accuracy: 42.00%

Comment 11: Thank you so much for making this video.. It's very useful for beginners..Keep up the good work!!

Prediction: Spam

Accuracy: 52.00%

Comment 12: Simply amazing.... thanks much!

Prediction: Not Spam

Accuracy: 36.31%

Comment 13: Thank you so much for this tutorial! I have recently been made a "key-user" for our department's SharePoint and boy did I have limited to no knowledges. I was provided with an booklet

from the company but the information doesn't cover half the information I got by going through your tutorial. It was extremely helpful in such a short time. I don't have quite all the permissions you had in your video, nor is our SharePoint the modern version, nonetheless the information was very educational and helpful. Looking forward to your other videos.

Prediction: Spam

Accuracy: 66.00%

Comment 14: Nicly Described, it looks like i m in live classroom session, each and every doubts clears before i ask....

Prediction: Not Spam

Accuracy: 11.00%

Comment 15: All this collections of videos are far the best to easily learn Sharepoint and practice at the same time, thanks!!!

Prediction: Not Spam

Accuracy: 37.00%

Comment 16: Dude you pretty much saved my job. Thank you honestly

Prediction: Spam

Accuracy: 62.37%

Comment 17: Thank you for this tutorial. I was tasked with designing a SharePoint Online site and I've never had experience as a site manager, only a user. This has been very helpful. I look forward to watching the Intermediate video.

Comment 32: Excellent video/training for beginners

Prediction: Not Spam

Accuracy: 1.02%

Comment 33: Great presentation. Thank you very much

Prediction: Spam

Accuracy: 59.15%

Comment 34: This video was so well done, I love how there are so many times where you go back and reiterates the step by step so it sinks in. Question though if I have "content approval" on, even though I uploaded the docs I cannot edit anything from my desktop, cant even save a new copy back into that folder. Is there a way to properly give permission's? There shouldn't be any restrictions for the Owner of the site.

Prediction: Spam

Accuracy: 59.00%

Comment 35: The annoying thing about Office 365 platforms like SharePoint is - eventually your videos are out of date and not applicable. Not only does YouTube not allow you to edit visuals of the video such as screenshots, but even the mentality of purpose of SharePoint has changed drastically since these videos. Learnit Training know this only too well. Check their channel for updates and revisions to SharePoint and other tools.

Prediction: Spam

Accuracy: 85.00%

Comment 36: Hi thanks for the video :) In the Workflow section, when I try to add a workflow on my end, the only option that is available is add Three-state. Is this the only option now? Thank you

Prediction: Spam

Accuracy: 58.00%

Comment 37: Thank you for such a thorough training session.. I am a site owner and building out my site. Learned so much. Will continue to the other videos after I finish this one...I have a question... How do I get that timeline on top of my page? Not sure you are going to go through this as I have only gone through half of this video right now.

Prediction: Spam

Accuracy: 75.00%

Comment 38: brilliant tutorial btw! well done ... subscribed :)

Prediction: Not Spam

Accuracy: 37.25%

Comment 39: How did you add Project Central, Project Red, Project Blue, Project Green? It's already there at the start of your tutorial vid... or did i missed it when you've put it there? thanks

Prediction: Spam

Accuracy: 63.21%

Comment 40: Described sharepoint in a very easy manner. Very nice tutorial. Is there any way to do hands on practice on sharepoint, to understand it in a more better way? I tried signing up to office 365

web version(Demo), but sharepoint is not available. Please suggest..

Prediction: Spam

Accuracy: 80.00%

Comment 41: great video, thank you!

Prediction: Spam

Accuracy: 54.00%

Comment 42: Very helpful thanks

Prediction: Not Spam

Accuracy: 36.26%

Comment 43: How do you get your Site Contents in a List or Detail view as yours? My understanding is the standard view is as tiles and I have not found a way to alter this without coding.

Prediction: Spam

Accuracy: 57.00%

Comment 44: I had a few questions relating to Share Point Online: 1) Where do I find the option to templatize a list/library after I have already created one? It seems Microsoft has removed this feature and I can't find how to do this anywhere! 2) Is there a way to Add retention settings through the Share Point site? I watched the video and it appears that Microsoft removed the feature from within the site and you have to go through the Admin Settings to establish a Retention Label and Retention Policy. Could you give update videos regarding these two questions? Please and thank you

Prediction: Spam

Accuracy: 87.00%

Accuracy: 36.26%

Comment 56: Can you modify the values for a choice column after being created?

Prediction: Not Spam

Accuracy: 36.72%

Comment 57: Hi, Any way to check file by folder in sharepoint?

Prediction: Spam

Accuracy: 92.00%

Comment 58: I have a question about the Contacts App - it seems to create a column where editing that column brings up a contact card with automatic fields like name, email, address - it is possible to create fields like that in a List? For example if I have a list of projects and one of my columns is external contact - how do I add the contact in that column with the ability to click their name and have all those other fields like name and email

Prediction: Not Spam

Accuracy: 49.00%

Comment 59: Great video. Well done. Besides the instructions I also like the screen recorder video tool you used. Can you tell me what you are using? Thank you.

Prediction: Spam

Accuracy: 66.00%

Comment 60: This is great. Thank you. I recently had a issue with my pc and had to factory reset my mac. Now that I have set everything up again, I want to know if I can map the document library as a drive on my laptop, without having to sync the document library, as I don't want to store library o my local drive. What is the best solution to access sharepoint document library without syncing and using web browser

Prediction: Spam

Accuracy: 67.00%

Comment 61: Why do I have completely different interface? also, I don't have Get Started menu ... Has MS updated SharePoint?

Prediction: Not Spam

Accuracy: 28.66%

Comment 62: While this is awesome, I'd love an update that is strictly Sharepoint modern, because that does not have any of the tabs and ribbons of the older version. For instance, how do I insert/edit/add stuff to the Page when I don't have the Insert tab or ribbon.

Prediction: Not Spam

Accuracy: 38.00%

Comment 63: I see this is dated nearly 2 years ago; is all the information still up to date. I find the style helpful but don't want to learn then find things have really moved on again.

Prediction: Not Spam

Accuracy: 36.00%

Comment 64: Does anyone know how to change the icons of files, specifically mp4?

Prediction: Not Spam

Accuracy: 4.18%

Comment 65: Under "workflows", I noticed MS turned off this function in 2020? Now have to use other apps?

Prediction: Not Spam

Accuracy: 7.09%

Comment 66: Hey, I am not able to ribon bar in my SharePoint. And also the edit button is also not available even if I am the manager/owner of the site

Prediction: Spam

Accuracy: 80.13%

Comment 67: As a administrator How to provide download access to add,/delete users

Prediction: Not Spam

Accuracy: 15.72%

Prediction: Not Spam

Accuracy: 7.60%

Comment 85: A beginners tutorial that throws 6 terms in the first 5 minutes, without visual comparison, or anything to draw the user in, and then a diagram of a multi-site structure that has not been practised in SharePoint for over 6 years. Was this video originally built for MOSS? Not a great start. Way too heavy for an end-user. Even our developers switched off after the bull spewed out in the 8th minute.

Prediction: Not Spam

Accuracy: 37.00%

Comment 86: I am confused. It took almost 10 minutes to show a SharePoint site. Before that it was terms, diagrams, and twaddle. Then the site you showed resembled the 2016 interface. The look and feel changed about half a dozen time since then. I appreciate Office 365 will always change and make the videos eventually out of date, but you look out of date already by 3 years since this was posted.

Prediction: Spam

Accuracy: 71.00%

Comment 87: A total time waste of 3 hours trying to understand sharepoint. Thats what happens when tutors dont have practical exposure to the subject.

Prediction: Not Spam

Accuracy: 10.75%

Comment 88: The puffy feast kinetically belong because output anatomically observe vice a skinny cold. clammy, vengeful fiberglass

Prediction: Not Spam

Accuracy: 2.29%
